

ALL ENGLAND

DIAMOND DRILLING & FIRE STOPPING

**Providing Diamond Drilling
& Fire Protection services
throughout the UK**

The Company

A family owned and operated business, based in Brentwood Essex close to the M25, giving easy access to all of London. With family members living in Sussex, Devon and Berkshire, we are able to undertake work throughout All England.

Specialising in all aspects of concrete cutting, fire prevention and Intumescent Coatings.

All operative are CSCS card holders, have LUCAS passes, CRB checked, FIRAS, PASMA, First Aid etc. Supervisors and managers are SSSTS certified.

Throughout the last 6 years we have built a reputation for time keeping and accurate costing, many times suggesting easier and cheaper ways of carrying out the works. We undertake repeat work for all our clients, many of whom we have term orders with.

We are able to undertake Fire Stopping surveys and prepare bills of quantities, visit sites throughout England and in many instances advise as to different options available at cheaper costs.

All England will undertake the works at the agreed time and place, for the agreed price. We are not in the business of stealth pricing.

W Blackshaw, Managing Director

Health & Safety

It is our aim to achieve a working environment which is free of work related accidents and ill-health, and to this end we will pursue continuing improvements from year to year.

We undertake to discharge our statutory duties by:

- Identifying hazards in the workplace, assessing the risks related to them and implementing appropriate preventative and protective measures
- Providing and maintaining safe work equipment
- Establishing and enforcing safe methods of work
- Recruiting and appointing personnel who have the skills, abilities and competence commensurate with their role and level of responsibility
- Ensuring that tasks given to employees are within their skills, knowledge and ability to perform
- Ensuring that technical competence is maintained through the provision of refresher training as appropriate
- Promoting awareness of health and safety and of good practice through the effective communications of relevant information

Furnishing sufficient funds needed to meet these objectives.

Accreditation

All England are FIRAS registered, who are a UKAS accredited third party certification scheme, which means you will be issued with a conformity certificate that actually means something and is recognised by major insurance companies and building control alike.

SSIP accreditation through Constructionline, giving confidence to our customers that we have been successfully assessed to Design and Management Regulations 2015.

Diamond Drilling & Sawing

Diamond Core Drilling is low noise, dust free and non-percussive drilling process used to produce openings of any size and shape. Using various Diamond Core Drilling strategies you can make openings of any range and size.

- Diamond Drilling
- Track and Wall Sawing
- Floor Sawing
- Wire Sawing
- Bursting
- Crunching
- Chasing
- Percussion Drilling
- RSJ Drilling
- Demolition
- Stitch Drilling

Fire Protection

Passive fire protection is installed to maintain the integrity and structure of the building, this can be achieved by the installation of various materials to afford the fire rating required to create fire compartments throughout the building.

- Intumescent collars/wraps
- Wall Penetrations
- Floor penetrations
- Gap Sealing
- Cladding to Steel Work
- Intumescent spraying to steel work
- Fire Curtains
- Fire Pillows

Intumescent Spraying

Intumescent paint is sprayed or hand applied to steel to protect it for up to 120 minutes.

The coating is normally white in colour with the texture of an orange and comes either water or solvent based.

The coating is applied to a certain thickness that is calculated beforehand, based on the size of the steels and is checked using an Elcometer, humidity and temperature are also critical and checked daily.

When steel reaches a critical temperature it can buckle or collapse, the intumescent coating in the event of a fire will expand up to 50 times its original thickness, reducing the heat on the steel, giving people time to vacate the area.

All our Intumescent spraying is backed by a FIRAS conformity certificate, giving both client and customers peace of mind.

Client List

Below are listed a few of the Companies for whom we regularly undertake work

Mitie	Vinci	GCL
Albany Homes	United House	QSF
Lovells	Breheny	Breyer
Diamond Build	Kilby & Gayford	Crispin & Borst
